

Save Money and Time with our Solutions! Wire & Cable Management

About Our Program

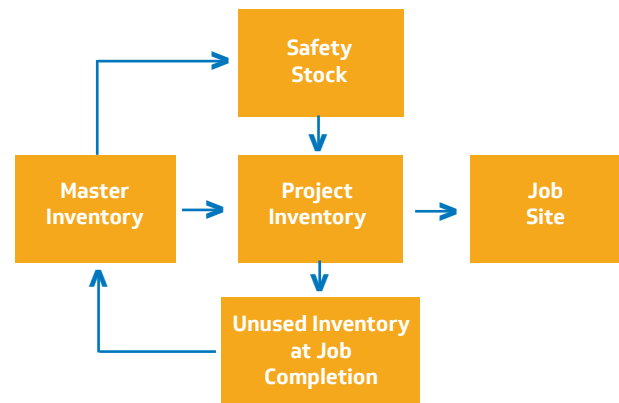

Selling Exclusively Through Distribution

Through our program, you can reduce the hidden costs of ownership through our superior logistics. Our cable expertise and dedicated project inventory is ideal for large construction and capital expansion projects.

Locations Across North America

Wire & Cable Management Process

5 Ways We Help You Improve Your Project Profitability

1 • Inventory & Distribution Center Accessibility

We manage the inventory, so there is never material shortage. With locations in North America, we can provide quick response times, same-day shipping, customer service, as well as a dedicated distribution center for storage space.

2 • Value-Added Services

In addition to finding the right inventory for your customers, we offer the following value-added services: cut-to-length reels, emergency service, shipment consolidation, and more.

3 • Industry Experts

Our sales team has industry-leading product knowledge to help with any vertical market. We provide support and on-site assistance as well to help keep the project on track.

4 • Scrap & Waste Mitigation

We provide a customized solution based on your specific project to mitigate the risk of scrap and waste.

5 • Cable Management Portal*

We provide an easy way to manage your project with our Cable Management Portal. We can manage the inventory, so there is never material shortage, change or modify inventory and specifications as needed, and adjust quantities throughout the project to reduce surplus material to help keep the project on track.

Portal Features Include:

Product spec sheets, job number, tracking & delivery information, and online chat with your dedicated Account Manager.

* To see if the portal is right for your project, or if you want more information, please contact your Account Manager.
